

## Multi-Purpose Eco Steamer Range

### Introduction

The Multi-Purpose Eco Steamer Range features a unique design that works very efficiently in using less than half of normal gas consumption to produce a maximum amount of steam in a faster time – preparing foods from frozen to served in approximately 7 minutes. Ideal for preparing Dim Sum and Chung Fung/Rice Roll dishes to an excellent standard.

The steamer units are compact in size which makes them suitable to be fitted inside smaller kitchens. It is recommended to install a water softener for this equipment in 'hard water' areas. The water consumption of the units is 0.331 litres per minute (19.81 litres per hour).

### Overview

Available for gas and electric
Energy efficient and eco-friendly
CE safety standards approved
One year boiler tank warranty
