

Multi-Purpose Eco Steamer Range

The Multi-Purpose Eco Steamer Range features a unique design that works very efficiently in using less than half of normal gas consumption to produce a maximum amount of steam in a faster time – preparing foods from frozen to served in approximately 7 minutes. Ideal for preparing Dim Sum and Chung Fung/Rice Roll dishes to an excellent standard.

The steamer units are compact in size which makes them suitable to be fitted inside smaller kitchens. It is recommended to install a water softener for this equipment in 'hard water' areas. The water consumption of the units is 0.331 litres per minute (19.81 litres per hour).

Available for gas and electric
Energy efficient and eco-friendly
CE safety standards approved
One year boiler tank warranty
